F5 and Tufin SecureTrack

PARTNERSHIP OVERVIEW

> "Tufin's integration with F5 Application Delivery Controllers enhances network security management by providing a complete and accurate view of end-to-end application connectivity."
>
> Reuven Harrison, CEO, Tufin

F5 and Tufin Partnership

Key benefits

- Monitor all policy changes in real time
- Act fast with configurable alerts
- Achieve continuous compliance
- Optimize your firewall policy

F5 and Tufin have partnered to help you better manage network security by giving you full visibility into and control over your firewall environment. When you integrate the Tufin SecureTrack software suite with your F5® BIG-IP® platform, you'll have the power to prevent and remediate risks, optimize rule bases and access control lists (ACLs), and achieve continuous compliance with standards. Integrating SecureTrack into your BIG-IP platform slashes the time wasted on repetitive, manual work—so you can finally focus on network security.

Take Control of Your Firewall Environment

To ensure security, you need visibility into every change to your firewall. SecureTrack provides a visual dashboard of your overall firewall configuration environment so you can identify risks to your security posture—and remediate them before they become a problem. The F5 and Tufin solution extends this capability to your BIG-IP platform, giving you an end-to-end view of your security posture. Having a near real-time view of your virtual servers, server pools, and other components—and protecting against unauthorized changes to the network environment—ensures that your enterprise remains secure.

For more information about the
F5 and Tufin partnership, visit
tufin@f5.com.

You can also find more details
on tufin.com.
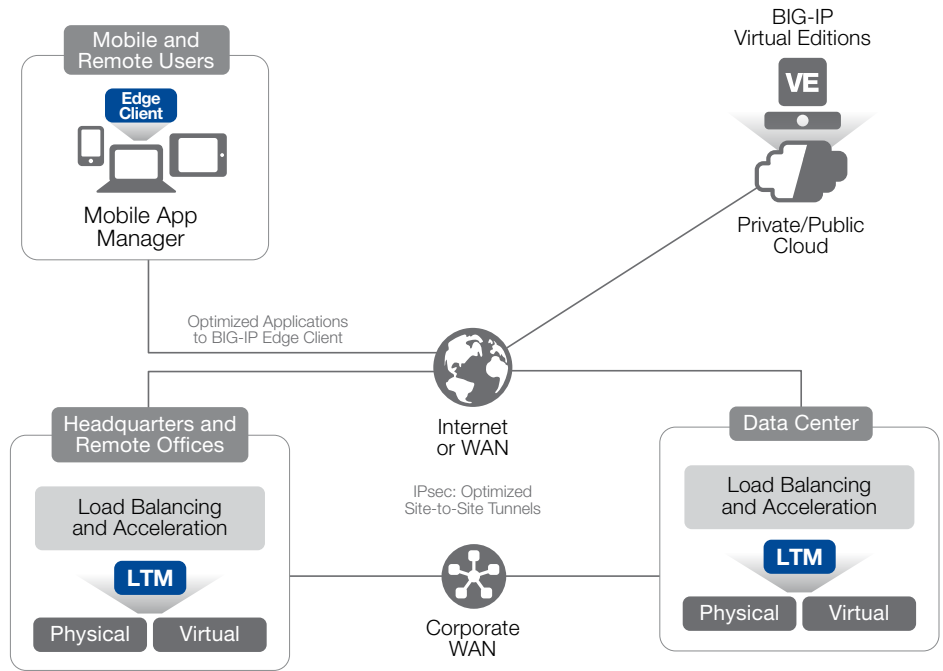

F5 BIG-IP functions as a crucial component in the network topology.

Monitor all policy changes in real time

By checking each change against your
approved security policy, SecureTrack
reveals potential violations before any
harm can occur.

Achieve continuous compliance

A comprehensive, accurate audit trail
provides full transparency and ensures
compliance with internal security as well
as regulatory policies.

Act fast with configurable alerts

SecureTrack notifies both security
administrators and business owners
about relevant configuration changes
to your BIG-IP system.

Optimize your firewall policy

Easily clean up unused rules and objects
that are potential security holes in your
BIG-IP system.
